LEARNING...

One of Europe’s most renowned radar institutes Fraunhofer FHR cordially invites you to join us for our upcoming International Summer School on Radar / SAR. Our program covers a wide range from radar fundamentals over state-of-the-art Radar/SAR systems to sophisticated signal processing techniques.

...and ENJOYING!

As a student at the International Summer School you will gain in-depth education on radar and synthetic aperture radar (SAR) techniques by distinguished international lecturers in a vibrant atmosphere. Our intellectually rewarding courses are accompanied by excursions as well as cultural and social events, introducing you to UNESCO’s World Heritage, the Upper Middle Rhine Valley, and to the famous city of Cologne.

CONTENTS

The main focus of the International Summer School on Radar/SAR lies particularly in imparting the knowledge of the physical fundamentals and technologies of modern Radar/SAR systems and the necessary signal processing steps. Special emphasis is put on imaging radar. Considered systems and applications are regarded under dual use aspects.

The challenging lectures and workshops feature crucial topics, such as:

- Introduction and fundamentals of radar technology
- Overview of different radar systems
- Antenna technology, phased array antennas, digital beamforming (DBF)
- Radar imaging (synthetic aperture radar - SAR)
- Interferometric SAR
- Bi- and multistatic passive radar / SAR systems
- Antennas and scattering
- Special radar techniques: waveform, Terahertz imaging, ultra wideband (UWB) radar, ground penetrating radar (GPR)
